

Saptarshi Debnath

Staff Engineer • System Design Architect

Driving technical excellence and scalable architectures in Big Tech Public Sector environments. No clearance required.

About Me

I am a Staff-level Software Engineer with over a decade of experience designing and operating highly available distributed systems.

Currently focused on enterprise-to-Big Tech narratives within the Public Sector, I specialize in Java ecosystems, asynchronously scalable architectures, and leading cross-functional engineering pods to deliver reliable, secure infrastructure for GovCloud and similar highly-regulated environments.
