Technical Architect and Staff Engineer specializing in the design, scaling, and modernization of high-latency, cloud-native distributed systems. Proven track record of leading architectural transformations, driving organizational engineering standards, and delivering resilient, zero-trust infrastructure at enterprise scale.

EXPERIENCE

Senior Software Engineer (Staff-Level Role) , Marriott International *(Remote/Hybrid)*

Nov 2023 - Present

- Leading technical strategy and architectural design for high-scale software infrastructure, supporting millions of transactions on native cloud environments.
- Serving as an organizational multiplier by defining software design patterns and best practices adopted by 4 cross-functional engineering pods.
- Directing large-scale performance optimizations for distributed microservices, ensuring single-digit millisecond latency for critical path APIs.
- Mentoring senior and lead engineers (5–6+ years exp) while advocating for zero-trust infrastructure and cloud-native resilience standards.
- Technologies: Java, Cloud Infrastructure, Distributed Systems, Microservices Architecture.

Senior Specialist (Technical Architect) , Deloitte | Client: Edward Jones

Feb 2023 - Nov 2023

- Served as a Technical Architect focusing on code quality, security standards, and modern design patterns for a financial contact application.
- Championed the adoption of test-driven development (TDD) and best practices through rigorous code reviews and developer mentorship.
- Collaborated with cross-functional teams to align legacy data workflows with cloud-native architectural standards.

Technical Architect / Lead , Mindtree Ltd | Client: Marriott International

Jan 2019 - Dec 2022

- Spearheaded the strategic transition of global monolithic applications to resilient, reactive microservices using Play/Akka and Spring WebFlux.
- Designed and scaled high-performance RESTful microservices for global reservations and property management systems.
- Championed organizational performance standards, tuning enterprise APIs to achieve sub-second latency.
- Technologies: Java 11/8, Play/Akka, Spring WebFlux, Couchbase, Red Hat OpenShift.

Earlier Career

Senior Software Engineer / Technical Lead , Mindtree Ltd | Client: Amex GBT *Sep 2017 - Dec 2018*

- Worked on the maintenance and feature development of a travel portal ecosystem consisting of 8 distinct microservices.
- Orchestrated automated testing and deployment strategies using Selenium, Jenkins, and Docker.
- Managed deployments across multiple environments (DEV, QA, PROD) using Red Hat OpenShift.
- Technologies: Java 8, Spring Boot, ActiveMQ, Cassandra, PostgreSQL, Redis, Angular 2.

Senior Software Engineer , Wipro Technologies | Client: Capital One *Oct 2015 - Aug 2017*

- Built an automated Software Intake Form workflow using AngularJS and Spring MVC.
- Certified AWS AMI images using Java 8 and Cucumber/Gherkin to ensure security and compliance.
- Automated virtual development environments utilizing Vagrant and VirtualBox.
- Technologies: Java 8, Shell Scripting, Vagrant, MongoDB, Node JS.

Senior Software Engineer / Team Lead , Wipro Technologies | Client: Novartis *Nov 2011 - Aug 2017*

- Acted as Onsite Coordinator/Team Lead for the maintenance of oncology e-marketing websites.
- Developed and optimized web platforms based on a proprietary Struts 1.x framework.
- Managed cross-functional communications between onsite clients and offshore teams.
- Technologies: Java 1.7, JSP, jQuery, Mootools.

Software Engineer , Wipro Technologies | Client: Bank Of New York Mellon *Sep 2009 - Oct 2011*

- Generated and transmitted highly customized reports between bank infrastructure and clients.
- Developed complex data extraction and reporting logic using Mainframe FOCUS and Actuate.
- Technologies: Mainframe FOCUS, DB2, VSAM, JCL.

Trainee Engineer , Objectsol Technologies (Kolkata, India) *Mar 2009 - Jul 2009*

- Developed an OpenGL ES 1.1 based iPhone game 'Crazee Cube'.
- Gained foundational experience in C++, iOS SDK, and computer graphics.

TECHNICAL SKILLS

System Architecture	Software Infrastructure	Software Design	Distributed Systems	Cloud-Native Design
Java / Spring / Akka	Asynchronous Java Programming	AWS & OpenShift	Docker & Kubernetes	
Kafka & Event-Driven	NoSQL (Couchbase, Cassandra, MongoDB, DocumentDB)	DevOps & CI/CD		
Performance Tuning				

EDUCATION

West Bengal University of Technology *2008*

Bachelor of Technology (B-Tech), Computer Science and Engineering
