Visionary Technical Architect and Staff Engineer with expansive expertise in designing, scaling, and modernizing high-latency, cloud-native distributed systems. Proven track record of leading architectural transformations, driving organizational engineering standards, and mentoring cross-functional teams to deliver highly available, zero-trust infrastructure. Seeking to leverage deep expertise in system design and microservices as a Principal Architect to drive enterprise-wide technical strategy.

EXPERIENCE

Senior Software Engineer , *Marriott International* **(Remote/Hybrid)**

Nov 2023 - Present

- Leading architectural design for high-scale software infrastructure on hybrid cloud environments.
- Optimizing system performance and resilience for distributed microservices architecture.
- Driving software design best practices across cross-functional engineering pods.
- Technologies: Java, Cloud Infrastructure, Distributed Systems.

Senior Specialist , *Deloitte (Hybrid)*

Feb 2023 - Nov 2023

- Delivered complex enterprise software solutions focused on scalability and security compliance.
- Collaborated with diverse stakeholders to modernize legacy infrastructure into cloud-native services.
- Mentored engineering teams on modern development methodologies and architectural standards.

Technical Architect / Lead , *Mindtree Ltd (Bethesda, MD)*

Jan 2019 - Dec 2022

- Designed and developed high-performance RESTful microservices for global reservations and property management systems.
- Spearheaded the transition of monolithic applications to resilient, cloud-native microservices using Play/Akka and Spring WebFlux.
- Performed extensive performance tuning for enterprise-level APIs to achieve single-digit millisecond latency.
- Technologies: Java 11/8, Play/Akka, Spring WebFlux, Couchbase, Red Hat OpenShift, Jenkins.

Technical Lead , *Mindtree Ltd (Scottsdale, AZ)*

Sep 2017 - Dec 2018

- Led the maintenance and feature development of a travel portal ecosystem consisting of 8 distinct microservices.
- Orchestrated automated testing and deployment strategies using Selenium, Jenkins, and Docker.
- Managed deployments across multiple environments (DEV, QA, PROD) using Red Hat OpenShift.
- Technologies: Java 8, Spring Boot, ActiveMQ, Cassandra, PostgreSQL, Redis, Angular 2.

Senior Software Engineer , Wipro Technologies (Richmond, VA) *Oct 2015 - Aug 2017*

- Built an automated Software Intake Form workflow using AngularJS and Spring MVC.
- Certified AWS AMI images using Java 8 and Cucumber/Gherkin to ensure security and compliance.
- Automated virtual development environments utilizing Vagrant and VirtualBox.
- Technologies: Java 8, Shell Scripting, Vagrant, MongoDB, Node JS.

Senior Software Engineer / Team Lead , Wipro Technologies (East Hanover, NJ) *Nov 2011 - Aug 2017*

- Acted as Onsite Coordinator/Team Lead for the maintenance of oncology e-marketing websites.
- Developed and optimized web platforms based on a proprietary Struts 1.x framework.
- Managed cross-functional communications between onsite clients and offshore teams.
- Technologies: Java 1.7, JSP, jQuery, Mootools.

Software Engineer , Wipro Technologies (Bangalore, India) *Sep 2009 - Oct 2011*

- Generated and transmitted highly customized reports between bank infrastructure and clients.
- Developed complex data extraction and reporting logic using Mainframe FOCUS and Actuate.
- Technologies: Mainframe FOCUS, DB2, VSAM, JCL.

Trainee Engineer , Objectsol Technologies (Kolkata, India) *Mar 2009 - Jul 2009*

- Developed an OpenGL ES 1.1 based iPhone game 'Craze Cube'.
- Gained foundational experience in C++, iOS SDK, and computer graphics.

TECHNICAL SKILLS

System Architecture, Software Infrastructure, Software Design, Distributed Systems, Cloud-Native Design, Java / Spring / Akka, AWS & OpenShift, Docker & Kubernetes, Kafka & Event-Driven, NoSQL (Couchbase, Cassandra), DevOps & CI/CD, Performance Tuning

EDUCATION

West Bengal University of Technology

2015

Bachelor of Technology (B-Tech), Computer Science and Engineering
